EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 54 **Subject Index** **2000**

Evolution, 54(6), 2000, pp. 2181–2192

ADAPTATION

Adaptation, C-S-R model, environmental stress, flowering time, life-history evolution, phenotypic selection, selection experiment, *Sinapis arvensis*, stress avoidance, stress tolerance, 93

Adaptation, common-garden experiment, garter snake, genotype × environment interaction, growth rate, temperature variation, *Thamnophis elegans*, 1760

Adaptation, complexity, Fisher's geometric model, fundamental theorem of natural selection, pleiotropy, 13

Adaptation, damselflies, *Enallagma*, enzyme kinetics, Odonata, predator avoidance, swimming, 2072

Adaptation, genetic drift, natural selection, peak shift, population structure, shifting balance, 306

Adaptive plasticity, canalization, environmental cues, interspecific competition, shade-avoidance responses, 441

Adaptive plasticity, cost of homeostasis, cost of plasticity, phytochrome, R:FR, 1982

Adaptive plasticity, density-dependent selection, environmental heterogeneity, local adaptation, natural selection, phenotypic plasticity, 1956

Adaptive variation, heterozygosity, inbreeding coefficient, phylogenetic tree, substitution rate, 2145

Agrostis capillaris, hemiparasitic plants, host-parasite interactions, local adaptation, *Rhinanthus serotinus*, virulence, 433

Amphibians, competition, divergent selection, local adaptation, phenotypic plasticity, *Spea*, 1738

Antagonism, clines, coevolution, gene flow, geographic mosaic theory, local adaptation, maladaptation, mutualism, 1102

Aquatic adaptations, Carnivora, comparative biology, independent comparisons, life histories, monophyly, pinnipeds, 1011

Coadaptation, drift, epistasis, Fisher-Wright controversy, heterosis, inbreeding depression, outbreeding depression, selection, shifting balance, 1157

Cupressaceae, cuticular waxes, genetic adaptation, heritabilities, hydrocarbons, water stress, 1438

Fecundity, house finch, local adaptation, overwinter survival, pairing success, peripheral population, sexual dimorphism, 987

Local adaptation, population differentiation, spatial variation, temporal variation, 1173

ALGAE

Chlamydomonas, conditional neutrality, environmental heterogeneity, fitness, genotype-environment interaction, mutation rate, mutational heritability, selection, 416

Chlamydomonas, diversity, genetic correlation, genetic distance, genotype-by-environment interaction, 425

AMPHIBIANS

Amphibians, competition, divergent selection, local adaptation, phenotypic plasticity, *Spea*, 1738

Anuran amphibians, external fertilizers, genetic benefits, polyandry, 968

Balancing selection, fitness, larval stage, LDH-B polymorphism, metamorphosis, nonneutral evolution, *Rana lessonae*, 1750

Geographic variation, intergenic spacer, mitochondrial DNA, mole salamander, molecular phylogenetics, phylogeography, 1449

Mate choice, mating preferences, playback experiments, preference functions, repeatability, sexual selection, treefrogs, 660

ARACHNIDS

Chiasma frequency, clines, harvestmen, hybrid zone, population cytogenetics, tandem fusion/fission, 176

Habronattus pugillis, lineage sorting, migration, mitochondrial DNA, molecular clock, phylogeography, sky islands, 1699

ARTHROPODS

Breeding systems, evolution, freshwater crustaceans, outcrossing, selfing, 878

Competition, eusociality, phylogenetically independent contrasts, phylogeny, snapping shrimps, social evolution, *Synalpheus*, 503

BACTERIA

Aphid, *Buchnera*, coevolution, cospeciation, phylogenetic congruence, symbiont, *Uroleucon*, 517

Conspecific sperm precedence, *Drosophila*, homogamy, multiple mating, reproductive isolation, seminal fluid, sperm competition, *Wolbachia*, 2028

Cytoplasmic incompatibility, *Drosophila* parasitoid, haplodiploid species, invasion strategy, *Wolbachia*, 191

Cytoplasmic incompatibility, *Drosophila simulans*, geographic variation, symbiont, *Wolbachia pipientis*, 1661

BEHAVIOR

Ambient temperature, body mass, cost of incubation, food, incubation behavior, incubation rhythm, life-history evolution, life-history strategy, mate feeding, nest attentiveness, nest predation, reproductive effort, Skutch's hypothesis, 670

Andrena nigroaenea, chemical communication, learning behavior, *Ophrys sphegodes*, pollination by sexual deception, reproductive success, scent variation, 1995

Behavior, premating isolation, reinforcement, sexual selection, speciation, 567

Charadrii, display behavior, niche division, sexual selection, size dimorphism, waders, 1404

BIOGEOGRAPHY

Adaptive radiation, angiosperms, character state change, diversity, flexibility hypothesis, Hawaiian flora, key innovation, phylogenetic effects, species richness, 1061

Amazonian savannas, continental drift, Guayana Shield, hummingbird pollination, *ndh* F, Rapateaceae, seed dispersal, tepuis, vicariance biogeography, 1915

Biogeography, bird dispersal, insular adaptations, internal transcribed spacers, molecular phylogeny, 1521

Biogeography, birds, oceanic islands, sympatric speciation, 2166

Biogeography, chloroplast DNA, colonization, haplotype tree, hybridization, phylogeography, Turneraceae, 815

Biogeography, cryptic speciation, dispersal, *Eurytemora affinis*, hybrid breakdown, phylogeography, 2014

Biogeography, *Girella*, mitochondrial DNA, population structure, 652

Canary Islands, colonization, Madeira, mitochondrial DNA, parametric bootstrap, phylogeography, 2081

Chloroplast DNA, gene flow, glacial refugia, hybridization/introgression, phylogeography, population structure, 1566

© 2000 The Society for the Study of Evolution. All rights reserved.

Coalescent theory, gene flow, intron, maximum likelihood, multilocus data, vicariance biogeography, 1839
Community genetics, *Eucalyptus*, generalists, herbivores, hybrid, specialists, species richness, terpenoids, 1938
Control region I, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Extinction, genetic divergence, island isolation, migration, speciation, 387
Geographic variation, intergenic spacer, mitochondrial DNA, mole salamander, molecular phylogenetics, phylogeography, 1449
Habronattus pugillis, lineage sorting, migration, mitochondrial DNA, molecular clock, phylogeography, sky islands, 1699
Larval life history, lecithotrophy, mitochondrial cytochrome oxidase I, planktotrophy, Spionidae, 1247

Birds

Amblyornis inornatus, bowerbirds, premating isolation, sexual selection, speciation, 273
Avian plumage coloration, character evolution, convergent evolution, evolutionary constraints, homoplasy, Icteridae, phylogeny, sexual selection, 2119
Biogeography, bird dispersal, insular adaptations, internal transcribed spacers, molecular phylogeny, 1521
Biogeography, birds, oceanic islands, sympatric speciation, 2166
Birds, gulls, hybrid superiority, hybrid zone, *Larus*, mate choice, 1774
Brachyramphus marmoratus, coalescent theory, intron, marbled murrelet, population differentiation, 974
Carpodacus mexicanus, genetic correlation, phenotypic covariance, sexual size dimorphism, 1784
Charadrii, display behavior, niche division, sexual selection, size dimorphism, waders, 1404
Cliff swallows, mortality, natural selection, selection index, selection intensity, 1824
Complexity, greenish warbler, *Phylloscopus trochiloides*, *plumbeitarsus*, ring species, sexual selection, song, speciation, 998
Fecundity, house finch, local adaptation, overwinter survival, pairing success, peripheral population, sexual dimorphism, 987
Fecundity, house finch, overwinter survival, pairing success, phenotypic selection, population divergence, sexual size dimorphism, 2134
Gene flow, grouse, *Lagopus*, mitochondrial DNA, philopatry, population structure, 279
Handicap principle, Hirundinidae, initial evolution, *Riparia riparia*, sexual selection, tail ornaments, 704

Book Reviews

Bridging the gap between population biology and paleobiology, a review of *Fossils and Evolution*, by Michael A. Bell, 1457
Cladists in wonderland, a review of *Species Concepts and Phylogenetic Theory*, by John C. Avise, 1828
Evolutionary biology and human altruism: a review of three books, a review of *Unto Others: The Evolution and Psychology of Unselfish Behavior*; *The Origins of Virtue: Human Instincts and the Evolution of Cooperation*; and *The Temptations of Evolutionary Ethics*, by Egbert Giles Leigh, Jr., 328
No light from the black cloud, a review of *Mathematics of Evolution*, by J. Bruce Walsh, 1461
Understanding the origin of species, a review of *Endless Forms: Species and Speciation*, by Douglas W. Schemske, 1069

Coalescence

Brachyramphus marmoratus, coalescent theory, intron, marbled murrelet, population differentiation, 974
Chloroplast, coalescence, haplotype, hybridization, *Pinus*, 1218
Coalescence theory, gene flow, likelihood ratio tests, maximum likelihood, population subdivision, single nucleotide polymorphisms, 44
Coalescent, divergence, genealogy, migration, species, 1092
Coalescent theory, gene flow, intron, maximum likelihood, multilocus data, vicariance biogeography, 1839

Coevolution

Acquired immunity, coevolution, epistasis, evolution of sex, fluctuating epistasis, Red Queen, 1142
Alkaloids, *Datura stramonium*, evolutionary arms race, hyoscyamine, insect herbivory, natural selection, scopolamine, 778
Antagonism, clines, coevolution, gene flow, geographic mosaic theory, local adaptation, maladaptation, mutualism, 1102
Aphid, *Buchnera*, coevolution, cospeciation, phylogenetic congruence, symbiont, *Uroleucon*, 517
Coevolution, convergent evolution, evolutionary trends, extended phenotypes, gall morphology, gradualism, insect-plant relationships, Nematinae, phylogeny, 526
Evolution of virulence, genetic trade-offs, host heterogeneity, host-parasite coevolution, intrahost evolution, serial passage, 64

Competition

Adaptive plasticity, canalization, environmental cues, interspecific competition, shade-avoidance responses, 441
Clonal competition, deleterious mutations, fixation, metapopulation, Muller's ratchet, 1116
Competition, eusociality, phylogenetically independent contrasts, phylogeny, snapping shrimps, social evolution, *Synalpheus*, 503
Competition, *Ipomopsis aggregata*, natural selection, pollination, 1546

Conservation Biology

Beneficial mutations, compensatory mutations, conservation genetics, drift load, genetic drift, mutation meltdown, sexual selection, 1855
Compensatory mutation, conservation genetics, drift load, extinction, Fisher's model, mutational meltdown, 1467

Crustaceans

Breeding systems, evolution, freshwater crustaceans, outcrossing, selfing, 878
Competition, eusociality, phylogenetically independent contrasts, phylogeny, snapping shrimps, social evolution, *Synalpheus*, 503
Gene flow, genetic distance, *Orchestia*, *Platorchestia*, population genetic structure, *Talitrus*, 1606

Development

Adaptation, common-garden experiment, garter snake, genotype × environment interaction, growth rate, temperature variation, *Thamnophis elegans*, 1760
Adaptive plasticity, canalization, environmental cues, interspecific competition, shade-avoidance responses, 441
Allometry, geometric morphometrics, growth, heterochrony, heterotopy, ontogeny, teleosts, 1363
Balancing selection, fitness, larval stage, LDH-B polymorphism, metamorphosis, nonneutral evolution, *Rana lessonae*, 1750
Betta, *Danio*, heterochrony, intraspecific variation, ossification sequence, zebrafish, 2091
Canalization, changing environments, epistasis, evolvability, genetic architecture, genetic variance, modifier selection, 1
Caribbean, development, *Drosophila*, genetics, pigmentation, speciation, 2057
Cis-regulation, development, evolution, evolutionarily relevant mutations, mutation, transcription, variation, 1079
Development, epistasis, indirect genetic effects, maternal effects, quantitative trait loci, 1882
Development and evolution, *Drosophila mauritiana*, *Drosophila melanogaster*, *Drosophila sechellia*, *Drosophila simulans*, *Drosophila yakuba*, ovariole number, phenotypic plasticity, 1638
Distyly, floral development, herkogamy, heterostyly, ontogeny, *Psychotria*, Rubiaceae, 847
Haeckel, heterochrony, molecular systematics, ontogeny, paedomorphosis, recapitulation, von Baer, 1349

Developmental Stability

Clonal growth, costs of plasticity, developmental stability, foraging, genetic variation, *Ranunculus reptans*, spurious correlations, 1947
Compartments, *Drosophila melanogaster*, fluctuating asymmetry,

geometric morphometrics, modularity, morphological integration, wing veins, 1273
Drosophila melanogaster, fluctuating asymmetry, heritability, selection, sternopleural bristle number, temperature stress, variation, 1444

Drosophila
Aging, *Drosophila*, mating frequency, 2152
Alcohol dehydrogenase, α glycerophosphate dehydrogenase, *Drosophila melanogaster*, gametic disequilibrium, inversions, latitudinal clines, polymorphism, 201
Allopatric, *Drosophila*, postzygotic, prezygotic, reinforcement, reproductive isolation, speciation, sympatric, 210
Allozymes, *Drosophila*, gametic disequilibrium, inversion polymorphism, 1673
Antagonistic pleiotropy, molecular chaperone, reproduction, senescence, trade-off, transgene, 2038
Caribbean, cline, *Drosophila*, pigmentation, selection, speciation, 2046
Caribbean, development, *Drosophila*, genetics, pigmentation, speciation, 2057
Characteristic value, *Drosophila melanogaster*, genetic architecture, genetic correlation, phenotypic plasticity, reaction norm, sexual dimorphism, 1035
Colonization, *Drosophila subobscura*, founder effect, microsatellites, nonequilibrium populations, RFLP, 696
Compartments, *Drosophila melanogaster*, fluctuating asymmetry, geometric morphometrics, modularity, morphological integration, wing veins, 1273
Conspecific sperm precedence, *Drosophila*, homogamy, multiple mating, reproductive isolation, seminal fluid, sperm competition, *Wolbachia*, 2028
Copulation duration, *Drosophila melanogaster*, receptivity, sperm displacement, sperm number, 534
Courtship song, *Drosophila*, female choice, sexual isolation, speciation, 1286
Cytoplasmic incompatibility, *Drosophila* parasitoid, haplodiploid species, invasion strategy, *Wolbachia*, 191
Development and evolution, *Drosophila mauritiana*, *Drosophila melanogaster*, *Drosophila sechellia*, *Drosophila simulans*, *Drosophila yakuba*, ovariole number, phenotypic plasticity, 1638
Drosophila, sperm competition, sperm precedence, 1030
Drosophila melanogaster, fat content, latitudinal cline, starvation resistance, 1819
Drosophila melanogaster, fluctuating asymmetry, heritability, selection, sternopleural bristle number, temperature stress, variation, 1444
Drosophila melanogaster, genetic load, pleiotropy, synergistic epistasis, 1654
Drosophila melanogaster, life-history trait, reproductive effort model, trade-off, 1260
Drosophila persimilis, *Drosophila pseudoobscura*, gene flow, genic introgression, reinforcement, speciation, 2176
Drosophila persimilis, *Drosophila pseudoobscura*, gene flow, introgression, reinforcement, speciation, 2174

Ecology
Adaptive radiation, angiosperms, character state change, diversity, flexibility hypothesis, Hawaiian flora, key innovation, phylogenetic effects, species richness, 1061
Allozymes, *Drosophila*, gametic disequilibrium, inversion polymorphism, 1673
Angiosperms, Bayes Theorem, comparative methods, diversity, flexibility hypothesis, phylogeny, 1066
Antagonism, grazing optimization, group selection, indirect effect, maximum power principle, mutualism, patchy environment, plant defense, plant palatability, primary production, spatial heterogeneity, 81
Canalization, changing environments, epistasis, evolvability, genetic architecture, genetic variance, modifier selection, 1
Charadrii, display behavior, niche division, sexual selection, size dimorphism, waders, 1404
Community genetics, *Eucalyptus*, generalists, herbivores, hybrid, specialists, species richness, terpenoids, 1938
Ecological genetics, ecological speciation, herbivory, host races, hybrid unfitness, speciation, 1626

Electrophoresis
Alcohol dehydrogenase, α glycerophosphate dehydrogenase, *Drosophila melanogaster*, gametic disequilibrium, inversions, latitudinal clines, polymorphism, 201
Allozymes, gene flow, microsatellites, mitochondrial DNA, natural selection, 640
Allozymes, phylogeny, *Rhagoletis*, speciation, sympatric, 543

Epistasis
Acquired immunity, coevolution, epistasis, evolution of sex, fluctuating epistasis, Red Queen, 1142
Canalization, changing environments, epistasis, evolvability, genetic architecture, genetic variance, modifier selection, 1
Coadaptation, drift, epistasis, Fisher-Wright controversy, heterosis, inbreeding depression, outbreeding depression, selection, shifting balance, 1157
Development, epistasis, indirect genetic effects, maternal effects, quantitative trait loci, 1882
DNA markers, epistasis, hybrid incompatibility, segregation distortion, 798
Drosophila melanogaster, genetic load, pleiotropy, synergistic epistasis, 1654
Epistasis, evolutionary genetics, Fisher's large population size theory, metapopulation quantitative genetics, multilevel selection, Wright's shifting balance theory, 317

Evolution
Acquired immunity, coevolution, epistasis, evolution of sex, fluctuating epistasis, Red Queen, 1142
Anniella, cytochrome *b*, parallel evolution, thermal melanism, 1041
Annual and perennial plants, evolution, evolutionarily stable strategy, iteroparity, semelparity, 145
Antagonism, grazing optimization, group selection, indirect effect, maximum power principle, mutualism, patchy environment, plant defense, plant palatability, primary production, spatial heterogeneity, 81
Aposematism, evolution, forgetting, learning, model, taste aversion, warning color, 751
Artificial selection, Brassicaceae, *Brassica rapa*, floral evolution, genetic constraints, genetic variation, *Raphanus raphanistrum*, 1433
Avian plumage coloration, character evolution, convergent evolution, evolutionary constraints, homoplasy, Icteridae, phylogeny, sexual selection, 2119
Balancing selection, fitness, larval stage, LDH-B polymorphism, metamorphosis, nonneutral evolution, *Rana lessonae*, 1750
Breeding systems, evolution, freshwater crustaceans, outcrossing, selfing, 878
Breeding time, divergence, migration time, rapid evolution, reproductive isolation, 1372
Cis-regulation, development, evolution, evolutionarily relevant mutations, mutation, transcription, variation, 1079
Coevolution, convergent evolution, evolutionary trends, extended phenotypes, gall morphology, gradualism, insect-plant relationships, Nematinae, phylogeny, 526
Comparative methods, correlated evolution, independent contrasts, simulations, taxon sampling, 1480
Control region I, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Correlated evolution, evolutionary constraint, *Heterandria formosa*, selection experiment, 238
Development and evolution, *Drosophila mauritiana*, *Drosophila melanogaster*, *Drosophila sechellia*, *Drosophila simulans*, *Drosophila yakuba*, ovariole number, phenotypic plasticity, 1638
Diptera, evolution, neurons, systematic, visual system, 888
Endothermy, homeothermy, reptile, thermoregulation, *Varanus*, 1768
Environment-dependent genetic parameters, environmental heterogeneity, genetic constraints, phenotypic plasticity, reciprocal transplant, trade-offs, 1969

Error threshold, genome evolution, genomic compression, mathematical model, multiple coding, overlapping genes, quasi-species, 731
Evolution, fitness variation, genetic systems, natural selection, 337
Evolution, population genetics, selection, sex limitation, sexual dimorphism, 37
Evolutionary dynamics, invasion fitness, Lotka-Volterra difference equations, metabolic profit, overdominance, 1899
Pesticide resistance, shifting balance theory, stepping stone model, stochastic migration, varying deme size, 324

EXTINCTION
Canary Islands, Coleoptera, colonization, diversification, extinction, mitochondrial DNA, 911
Compensatory mutation, conservation genetics, drift load, extinction, Fisher's model, mutational meltdown, 1467
Extinction, genetic divergence, island isolation, migration, speciation, 387

FISHES
Allometry, geometric morphometrics, growth, heterochrony, heterotopy, ontogeny, teleosts, 1363
Betta, Danio, heterochrony, intraspecific variation, ossification sequence, zebrafish, 2091
Biogeography, *Girella,* mitochondrial DNA, population structure, 652
Black surfperch, Embiotocidae, gene flow, larval dispersal, mtDNA, 226
Breeding time, divergence, migration time, rapid evolution, reproductive isolation, 1372
Breeding time, egg size, growth, maternal effects, mortality, *Salmo salar,* selection, 628
Carotenoid coloration, condition-dependent indicators, geographic variation, mate choice, sexual selection, 1712
Cichlid, divergence with gene flow, habitat fragmentation, Lake Malawi, mbuna, *Metriaclima,* population structure, 1725
Cichlids, disruptive selection, interbreeding, mate recognition system, separatrix, sexual selection, speciation, 1870
Egg preference, energy reserves, mate sampling, residual reproductive value, sexual selection, 617

FITNESS
Allometric engineering, fitness surfaces, follicle ablations, maternal effects, neighborhoods, selection gradients, spatial variation, 1396
Allozymes, Diptera, fitness, *Scathophaga,* sexual selection, sperm competition, 1680
Altruism, fecundity, overlapping generations, population structure, prisoner's dilemma, survival, 1135
Arenaria uniflora, autogamy, male fitness, pollen discounting, self-fertilization, 1558
Bacteriophage evolution, deleterious mutations, experimental evolution, fitness, RNA viruses, 686
Balancing selection, episodes of selection, lifetime fitness, longevity, natural selection, sexual selection, 558
Balancing selection, fitness, larval stage, LDH-B polymorphism, metamorphosis, nonneutral evolution, *Rana lessonae,* 1750
Caenorhabditis elegans, deleterious mutation, dominance, fitness, life-history characters, mutation load, mutation rate, quantitative traits, 1234
Callosobruchus maculatus, fecundity, genetic compatibility, polyandry, 2161
Chlamydomonas, conditional neutrality, environmental heterogeneity, fitness, genotype-environment interaction, mutation rate, mutational heritability, selection, 416
Colorado, demography, diallel, lifetime fitness, natural populations, reproductive isolation, 485
Conifers, fitness, genetic mapping, growth, inbreeding depression, loblolly pine, *Pinus taeda,* plants, stage specificity, survival, 1580
Correlational selection, curvature selection, female fitness, hawkmoths, male fitness, orchids, phenotypic selection, plant reproduction, pollination, projection, selection surfaces, 112
Evolution, fitness variation, genetic systems, natural selection, 337
Fecundity, house finch, local adaptation, overwinter survival, pairing success, peripheral population, sexual dimorphism, 987
Fecundity, house finch, overwinter survival, pairing success, phenotypic selection, population divergence, sexual size dimorphism, 2134
Fitness, flowering phenology, germination, life-history evolution, maternal effects, parental effects, *Plantago lanceolata,* temperature, 1207

FUNGI
Basidiomycetes, ectomycorrhiza, *Hebeloma crustuliniforme,* reproductive isolation, sexual intercompatibility, speciation, 1192
Cost of resistance, disease, herbivory, mutualism, parasitism, rust fungi, tolerance, 51

GASTROPODS
Bulinus truncatus, environmental determination, inbred lines, phally polymorphism, self-fertilization, threshold traits, 1614
Melanoides tuberculata, parthenogenesis, punctuated equilibrium, Raup's model, shell morphometry, 492

GENE FLOW
Allozymes, gene flow, microsatellites, mitochondrial DNA, natural selection, 640
Amazonian savannas, continental drift, Guayana Shield, hummingbird pollination, *ndh* F, Rapateaceae, seed dispersal, tepuis, vicariance biogeography, 1915
Anolis oculatus, cytochrome *b,* Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Antagonism, clines, coevolution, gene flow, geographic mosaic theory, local adaptation, maladaptation, mutualism, 1102
Asexual reproduction, clonal, fragmentation, genetic diversity, larval dispersal, scleractinian coral, 1590
Autodiploid parthenogenesis, *Campeloma limum,* dispersal, juvenile survivorship, mtDNA sequence variation, parasitism, sexual reproduction, 167
Biogeography, bird dispersal, insular adaptations, internal transcribed spacers, molecular phylogeny, 1521
Biogeography, chloroplast DNA, colonization, haplotype tree, hybridization, phylogeography, Turneraceae, 815
Biogeography, cryptic speciation, dispersal, *Eurytemora affinis,* hybrid breakdown, phylogeography, 2014
Black surfperch, Embiotocidae, gene flow, larval dispersal, mtDNA, 226
Breeding time, divergence, migration time, rapid evolution, reproductive isolation, 1372
Canary Islands, Coleoptera, colonization, diversification, extinction, mitochondrial DNA, 911
Canary Islands, colonization, Madeira, mitochondrial DNA, parametric bootstrap, phylogeography, 2081
Chloroplast DNA, gene flow, glacial refugia, hybridization/introgression, phylogeography, population structure, 1566
Chorthippus parallelus, colonization, grasshopper, likelihood, mating, Orthoptera, premating isolation, refugia, reproductive isolation, speciation, 1687
Cichlid, divergence with gene flow, habitat fragmentation, Lake Malawi, mbuna, *Metriaclima,* population structure, 1725
Coalescence theory, gene flow, likelihood ratio tests, maximum likelihood, population subdivision, single nucleotide polymorphisms, 44
Coalescent, divergence, genealogy, migration, species, 1092
Coalescent theory, gene flow, intron, maximum likelihood, multilocus data, vicariance biogeography, 1839
Colonization, *Drosophila subobscura,* founder effect, microsatellites, nonequilibrium populations, RFLP, 696
Colonization, gene flow, Hawaii, microevolution, *Odontosoria,* 828
Differential migration, interdemic selection, *Phalacrus substriatus,* 297
Drosophila persimilis, Drosophila pseudoobscura, gene flow, genic introgression, reinforcement, speciation, 2176

Drosophila persimilis, Drosophila pseudoobscura, gene flow, introgression, reinforcement, speciation, 2174
Fire ants, gene flow, isozymes, migration-selection balance, population structure, selection, *Solenopsis invicta,* 606
Gene flow, genetic distance, *Orchestia, Platorchestia,* population genetic structure, *Talitrus,* 1606
Gene flow, grouse, *Lagopus,* mitochondrial DNA, philopatry, population structure, 279
Habronattus pugillis, lineage sorting, migration, mitochondrial DNA, molecular clock, phylogeography, sky islands, 1699

GENETIC DRIFT
Acoustic, cuticular hydrocarbons, founder effect, mating signal, morphology, Orthoptera, refugia, reproductive isolation, speciation, 574
Adaptation, genetic drift, natural selection, peak shift, population structure, shifting balance, 306
Beneficial mutations, compensatory mutations, conservation genetics, drift load, genetic drift, mutation meltdown, sexual selection, 1855
Coadaptation, drift, epistasis, Fisher-Wright controversy, heterosis, inbreeding depression, outbreeding depression, selection, shifting balance, 1157
Compensatory mutation, conservation genetics, drift load, extinction, Fisher's model, mutational meltdown, 1467
Genetic drift, mountain islands, *Pinus balfouriana,* population structure, serpentine soil, 1813

HERBIVORY
Alkaloids, *Datura stramonium,* evolutionary arms race, hyoscyamine, insect herbivory, natural selection, scopolamine, 778
Artificial damage, herbivory, measurement error, natural damage, tolerance, 1024
Community genetics, *Eucalyptus,* generalists, herbivores, hybrid, specialists, species richness, terpenoids, 1938
Compensatory regrowth, *Ipomopsis aggregata,* plant-herbivore interaction, quantitative genetics, scarlet gilia, tolerance, ungulate grazing, 764
Cost of resistance, disease, herbivory, mutualism, parasitism, rust fungi, tolerance, 51
Costs, *Datura stramonium,* genotype × environment interactions, herbivory, phenotypic plasticity, tolerance, 789
Ecological genetics, ecological speciation, herbivory, host races, hybrid unfitness, speciation, 1626

HERITABILITY
Chlamydomonas, conditional neutrality, environmental heterogeneity, fitness, genotype-environment interaction, mutation rate, mutational heritability, selection, 416
Cupressaceae, cuticular waxes, genetic adaptation, heritabilities, hydrocarbons, water stress, 1438
Drosophila melanogaster, fluctuating asymmetry, heritability, selection, sternopleural bristle number, temperature stress, variation, 1444

HYBRIDIZATION
Acoustic communication, crickets, interspecific hybridization, mate recognition, phonotaxis, preference functions, speciation, 1303
Allochronic speciation, assortative mating, color polymorphism, hybridization, *Magicicada,* risk spreading, secondary contact, 1326
Biogeography, chloroplast DNA, colonization, haplotype tree, hybridization, phylogeography, Turneraceae, 815
Biogeography, cryptic speciation, dispersal, *Eurytemora affinis,* hybrid breakdown, phylogeography, 2014
Birds, gulls, hybrid superiority, hybrid zone, *Larus,* mate choice, 1774
Chiasma frequency, clines, harvestmen, hybrid zone, population cytogenetics, tandem fusion/fission, 176
Chloroplast, coalescence, haplotype, hybridization, *Pinus,* 1218
Chloroplast DNA, gene flow, glacial refugia, hybridization/introgression, phylogeography, population structure, 1566
Clonal reproduction, clonal structure, genotypic diversity, hybrid speciation, Louisiana irises, natural hybridization, 137
Community genetics, *Eucalyptus,* generalists, herbivores, hybrid, specialists, species richness, terpenoids, 1938
Crossing relationships, *Helianthus,* hybrid speciation, hybridization, pollen viability, seed set, sunflower, 859
DNA markers, epistasis, hybrid incompatibility, segregation distortion, 798
Drosophila persimilis, Drosophila pseudoobscura, gene flow, genic introgression, reinforcement, speciation, 2176
Drosophila persimilis, Drosophila pseudoobscura, gene flow, introgression, reinforcement, speciation, 2174
Ecological genetics, ecological speciation, herbivory, host races, hybrid unfitness, speciation, 1626
Fertility selection, genetic assimilation, *Helianthus annuus, Helianthus bolanderi,* hybrid index, hybrid zone, morphological evolution, sunflower, 462
Genomic imprinting, greenhouse experiment, hybrid inviability, Onagraceae, reciprocal crosses, triploid block, 1182

INBREEDING
Adaptive variation, heterozygosity, inbreeding coefficient, phylogenetic tree, substitution rate, 2145
Bicyclus anynana, butterfly, genetic load, inbreeding depression, lethal equivalents, metapopulation, 218
Bulinus truncatus, environmental determination, inbred lines, phally polymorphism, self-fertilization, threshold traits, 1614
Coadaptation, drift, epistasis, Fisher-Wright controversy, heterosis, inbreeding depression, outbreeding depression, selection, shifting balance, 1157
Conifers, fitness, genetic mapping, growth, inbreeding depression, loblolly pine, *Pinus taeda,* plants, stage specificity, survival, 1580
Family selection, inbreeding, kin selection, maternal effects, maternal-fetal interaction, neutrality, 290
Genetic association, *Gilia,* herkogamy, inbreeding depression, mating-system evolution, 840
Gynodioecy, inbreeding depression, Lamiaceae, outcrossing rate, seed production, sex ratio, 1510

INSECTS. SEE ALSO *DROSOPHILA*
Acoustic, cuticular hydrocarbons, founder effect, mating signal, morphology, Orthoptera, refugia, reproductive isolation, speciation, 574
Acoustic communication, crickets, interspecific hybridization, mate recognition, phonotaxis, preference functions, speciation, 1303
Acrididae, divergence times, insects, Melanoplinae, *Melanoplus,* Orthoptera, phylogeny, Pleistocene, sexual selection, speciation, 1337
Adaptation, damselflies, *Enallagma,* enzyme kinetics, Odonata, predator avoidance, swimming, 2072
Allochronic isolation, life-cycle evolution, *Magicicada,* reinforcement, reproductive character displacement, reproductive isolation, speciation, 1313
Alternative strategies, dung beetles, maternal effects, parental care, paternal effects, 936
Aphid, *Buchnera,* coevolution, cospeciation, phylogenetic congruence, symbiont, *Uroleucon,* 517
Bicyclus anynana, butterfly, genetic load, inbreeding depression, lethal equivalents, metapopulation, 218
Callosobruchus maculatus, fecundity, genetic compatibility, polyandry, 2161
Canary Islands, Coleoptera, colonization, diversification, extinction, mitochondrial DNA, 911
Copula duration, optimality theory, P_2, *Scatophaga,* sperm competition, 924
Correlational selection, curvature selection, female fitness, hawkmoths, male fitness, orchids, phenotypic selection, plant reproduction, pollination, projection, selection surfaces, 112
Damselflies, density-dependent selection, female color polymorphism, fertility, frequency-dependent selection, population structure, 2156
Differential migration, interdemic selection, *Phalacrus substriatus,* 297
Diptera, evolution, neurons, systematic, visual system, 888

DNA, fruit fly, mating isolation, speciation, sympatry, tephritid, 899
DNA microsatellites, nuptial feeding, sperm competition, sperm storage, tettigoniids, 942
Fire ants, gene flow, isozymes, migration-selection balance, population structure, selection, *Solenopsis invicta*, 606
Morphological polymorphism, soldier class, sperm competition, sperm-male conflict, 72

Life History
Adaptation, C-S-R model, environmental stress, flowering time, life-history evolution, phenotypic selection, selection experiment, *Sinapis arvensis*, stress avoidance, stress tolerance, 93
Amazon Basin, life history, mitochondrial DNA, population genetic structure, *Proechimys*, 1423
Ambient temperature, body mass, cost of incubation, food, incubation behavior, incubation rhythm, life-history evolution, life-history strategy, mate feeding, nest attentiveness, nest predation, reproductive effort, Skutch's hypothesis, 670
Antagonistic pleiotropy, cactus hosts, *Drosophila*, inversion polymorphism, life-history traits, 1295
Aquatic adaptations, Carnivora, comparative biology, independent comparisons, life histories, monophyly, pinnipeds, 1011
Caenorhabditis elegans, deleterious mutation, dominance, fitness, life-history characters, mutation load, mutation rate, quantitative traits, 1234
Cost of reproduction, dispersal, kin selection, life history, relatedness, 293
Daphnia, genetic slippage, life-history evolution, linkage disequilibrium, parthenogenetic, quantitative traits, 1502
Drosophila melanogaster, life-history trait, reproductive effort model, trade-off, 1260
Fitness, flowering phenology, germination, life-history evolution, maternal effects, parental effects, *Plantago lanceolata*, temperature, 1207
Larval life history, lecithotrophy, mitochondrial cytochrome oxidase I, planktotrophy, Spionidae, 1247

Lizards
Allometry, *Anolis* lizards, ANOVA, body size, comparative methods, phylogenetic effect, sexual selection, 259
Anniella, cytochrome *b*, parallel evolution, thermal melanism, 1041
Anolis, ecomorphology, lizard, phenotypic plasticity, 301
Anolis oculatus, cytochrome *b*, Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Cost of reproduction, endurance, locomotor performance, natural selection, ovarian manipulation, reproductive burden, *Uta stansburiana*, yolkectomy, 1386

Mammals
Amazon Basin, life history, mitochondrial DNA, population genetic structure, *Proechimys*, 1423
Aquatic adaptations, Carnivora, comparative biology, independent comparisons, life histories, monophyly, pinnipeds, 1011
Beaked whales, dentition, *Mesoplodon*, species isolating mechanism, species recognition, 2171
Common shrew, *F*-statistics, mitochondrial DNA, *R*-statistics, *Sorex araneus*, Y chromosome, 1414
Compensatory regrowth, *Ipomopsis aggregata*, plant-herbivore interaction, quantitative genetics, scarlet gilia, tolerance, ungulate grazing, 764

Maternal Effect
Allometric engineering, fitness surfaces, follicle ablations, maternal effects, neighborhoods, selection gradients, spatial variation, 1396
Alternative strategies, dung beetles, maternal effects, parental care, paternal effects, 936
Breeding time, egg size, growth, maternal effects, mortality, *Salmo salar*, selection, 628
C effects, carry-over effects, clonal propagation, *Eriophorum*, intergenerational environmental effects, maternal effects, quantitative genetics, 452
Development, epistasis, indirect genetic effects, maternal effects, quantitative trait loci, 1882
Family selection, inbreeding, kin selection, maternal effects, maternal-fetal interaction, neutrality, 290
Fitness, flowering phenology, germination, life-history evolution, maternal effects, parental effects, *Plantago lanceolata*, temperature, 1207
Gynodioecy, heterostyly, male sterility, maternal effects, pollen performance, resource allocation, 866

Mitochondrial DNA
Allozymes, gene flow, microsatellites, mitochondrial DNA, natural selection, 640
Amazon Basin, life history, mitochondrial DNA, population genetic structure, *Proechimys*, 1423
Anniella, cytochrome *b*, parallel evolution, thermal melanism, 1041
Anolis oculatus, cytochrome *b*, Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Autodiploid parthenogenesis, *Campeloma limum*, dispersal, juvenile survivorship, mtDNA sequence variation, parasitism, sexual reproduction, 167
Biogeography, *Girella*, mitochondrial DNA, population structure, 652
Black surfperch, Embiotocidae, gene flow, larval dispersal, mtDNA, 226
Canary Islands, Coleoptera, colonization, diversification, extinction, mitochondrial DNA, 911
Canary Islands, colonization, Madeira, mitochondrial DNA, parametric bootstrap, phylogeography, 2081
Common shrew, *F*-statistics, mitochondrial DNA, *R*-statistics, *Sorex araneus*, Y chromosome, 1414
Control region 1, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Gene flow, grouse, *Lagopus*, mitochondrial DNA, philopatry, population structure, 279
Geographic variation, intergenic spacer, mitochondrial DNA, mole salamander, molecular phylogenetics, phylogeography, 1449
Habronattus pugillis, lineage sorting, migration, mitochondrial DNA, molecular clock, phylogeography, sky islands, 1699
Larval life history, lecithotrophy, mitochondrial cytochrome oxidase I, planktotrophy, Spionidae, 1247

Models/Simulations
Adaptation, C-S-R model, environmental stress, flowering time, life-history evolution, phenotypic selection, selection experiment, *Sinapis arvensis*, stress avoidance, stress tolerance, 93
Adaptation, complexity, Fisher's geometric model, fundamental theorem of natural selection, pleiotropy, 13
Adaptation, genetic drift, natural selection, peak shift, population structure, shifting balance, 306
Ancestor-state reconstruction, autoregression model, comparative method, phylogenetic inertia, *Tithonia*, 475
Ancestral reconstruction, comparative methods, computer simulation, independent contrasts, known phylogeny, squared-change parsimony, 397
Antagonism, grazing optimization, group selection, indirect effect, maximum power principle, mutualism, patchy environment, plant defense, plant palatability, primary production, spatial heterogeneity, 81
Aposematism, evolution, forgetting, learning, model, taste aversion, warning color, 751
Assortative mating, isolating mechanisms, models, preferences, reinforcement, speciation, 21
Centrifugal speciation, holey adaptive landscapes, mathematical modeling, parapatric, peripatric, 1126
Comparative methods, correlated evolution, independent contrasts, simulations, taxon sampling, 1480
D', disequilibrium coefficient, gametic disequilibrium, measures of the extent of disequilibrium, multiallelic loci, 1809

Dietary restriction, fluctuating environments, longevity, maintenance, mice, model, resource allocation, 740
Distorter, meiotic drive, metapopulation model, responder, segregation distortion, Tcd, Tcr, 1795
Diversification, mathematical modeling, metapopulation, speciation, 1493
Drosophila melanogaster, life-history trait, reproductive effort model, trade-off, 1260
Epistasis, evolutionary genetics, Fisher's large population size theory, metapopulation quantitative genetics, multilevel selection, Wright's shifting balance theory, 317
Evolutionary dynamics, invasion fitness, Lotka-Volterra difference equations, metabolic profit, overdominance, 1899
Pesticide resistance, shifting balance theory, stepping stone model, stochastic migration, varying deme size, 324

MOLECULAR EVOLUTION
Cospeciation, host switching, Markov chain Monte Carlo, molecular biology, molecular evolution, phylogeny, 352
Distorter, meiotic drive, metapopulation model, responder, segregation distortion, Tcd, Tcr, 1795
Haeckel, heterochrony, molecular systematics, ontogeny, paedomorphosis, recapitulation, von Baer, 1349

MOLLUSKS
Bulinus truncatus, environmental determination, inbred lines, phally polymorphism, self-fertilization, threshold traits, 1614
Melanoides tuberculata, parthenogenesis, punctuated equilibrium, Raup's model, shell morphometry, 492

MORPHOLOGY
Adaptation, complexity, Fisher's geometric model, fundamental theorem of natural selection, pleiotropy, 13
Allometry, geometric morphometrics, growth, heterochrony, heterotopy, ontogeny, teleosts, 1363
Carpodacus mexicanus, genetic correlation, phenotypic covariance, sexual size dimorphism, 1784
Character spaces, constraints, exhaustion, fossils, homoplasy, phylogeny, saturation, 365
Compartments, *Drosophila melanogaster*, fluctuating asymmetry, geometric morphometrics, modularity, morphological integration, wing veins, 1273
Complexity, greenish warbler, *Phylloscopus trochiloides, plumbeitarsus*, ring species, sexual selection, song, speciation, 998
Melanoides tuberculata, parthenogenesis, punctuated equilibrium, Raup's model, shell morphometry, 492

MUTATIONS
Bacteriophage evolution, deleterious mutations, experimental evolution, fitness, RNA viruses, 686
Beneficial mutations, compensatory mutations, conservation genetics, drift load, genetic drift, mutation meltdown, sexual selection, 1855
Caenorhabditis elegans, deleterious mutation, dominance, fitness, life-history characters, mutation load, mutation rate, quantitative traits, 1234
Chlamydomonas, conditional neutrality, environmental heterogeneity, fitness, genotype-environment interaction, mutation rate, mutational heritability, selection, 416
Cis-regulation, development, evolution, evolutionarily relevant mutations, mutation, transcription, variation, 1079
Clonal competition, deleterious mutations, fixation, metapopulation, Muller's ratchet, 1116
Compensatory mutation, conservation genetics, drift load, extinction, Fisher's model, mutational meltdown, 1467

PARASITISM
Agrostis capillaris, hemiparasitic plants, host-parasite interactions, local adaptation, *Rhinanthus serotinus*, virulence, 433
Autodiploid parthenogenesis, *Campeloma limum*, dispersal, juvenile survivorship, mtDNA sequence variation, parasitism, sexual reproduction, 167
Cospeciation, host switching, Markov chain Monte Carlo, molecular biology, molecular evolution, phylogeny, 352
Cost of resistance, disease, herbivory, mutualism, parasitism, rust fungi, tolerance, 51
Cytoplasmic incompatibility, *Drosophila* parasitoid, haplodiploid species, invasion strategy, *Wolbachia*, 191
Evolution of virulence, genetic trade-offs, host heterogeneity, host-parasite coevolution, intrahost evolution, serial passage, 64

PHENOTYPIC PLASTICITY
Acoustic communication, cross-environment genetic correlation, environmental heterogeneity, phenotypic plasticity, reaction norm, sexual selection, ultrasonic signaling, 953
Adaptive plasticity, canalization, environmental cues, interspecific competition, shade-avoidance responses, 441
Adaptive plasticity, cost of homeostasis, cost of plasticity, phytochrome, R:FR, 1982
Adaptive plasticity, density-dependent selection, environmental heterogeneity, local adaptation, natural selection, phenotypic plasticity, 1956
Amphibians, competition, divergent selection, local adaptation, phenotypic plasticity, *Spea*, 1738
Anolis, ecomorphology, lizard, phenotypic plasticity, 301
Bulinus truncatus, environmental determination, inbred lines, phally polymorphism, self-fertilization, threshold traits, 1614
Canalization, changing environments, epistasis, evolvability, genetic architecture, genetic variance, modifier selection, 1
Carcinus maenas, cogradient variation, countergradient variation, crab predation, growth, latitude, *Littorina obtusata*, natural selection, phenotypic plasticity, water temperature, 151
Characteristic value, *Drosophila melanogaster*, genetic architecture, genetic correlation, phenotypic plasticity, reaction norm, sexual dimorphism, 1035
Clonal growth, costs of plasticity, developmental stability, foraging, genetic variation, *Ranunculus reptans*, spurious correlations, 1947
Correlational selection, environmental heterogeneity, phenotypic selection, plasticity, shade-avoidance responses, 124
Costs, *Datura stramonium*, genotype × environment interactions, herbivory, phenotypic plasticity, tolerance, 789
Development and evolution, *Drosophila mauritiana, Drosophila melanogaster, Drosophila sechellia, Drosophila simulans, Drosophila yakuba*, ovariole number, phenotypic plasticity, 1638
Environment-dependent genetic parameters, environmental heterogeneity, genetic constraints, phenotypic plasticity, reciprocal transplant, trade-offs, 1969

PHYLOGENY
Acrididae, divergence times, insects, Melanoplinae, *Melanoplus*, Orthoptera, phylogeny, Pleistocene, sexual selection, speciation, 1337
Adaptive variation, heterozygosity, inbreeding coefficient, phylogenetic tree, substitution rate, 2145
Allozymes, phylogeny, *Rhagoletis*, speciation, sympatric, 543
Ancestor-state reconstruction, autoregression model, comparative method, phylogenetic inertia, *Tithonia*, 475
Ancestral reconstruction, comparative methods, computer simulation, independent contrasts, known phylogeny, squared-change parsimony, 397
Angiosperms, Bayes Theorem, comparative methods, diversity, flexibility hypothesis, phylogeny, 1066
Anolis oculatus, cytochrome *b*, Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Avian plumage coloration, character evolution, convergent evolution, evolutionary constraints, homoplasy, Icteridae, phylogeny, sexual selection, 2119
Biogeography, bird dispersal, insular adaptations, internal transcribed spacers, molecular phylogeny, 1521
Biogeography, chloroplast DNA, colonization, haplotype tree, hybridization, phylogeography, Turneraceae, 815
Character spaces, constraints, exhaustion, fossils, homoplasy, phylogeny, saturation, 365
Coalescence theory, gene flow, likelihood ratio tests, maximum likelihood, population subdivision, single nucleotide polymorphisms, 44
Coevolution, convergent evolution, evolutionary trends, extend-

ed phenotypes, gall morphology, gradualism, insect-plant relationships, Nematinae, phylogeny, 526
Competition, eusociality, phylogenetically independent contrasts, phylogeny, snapping shrimps, social evolution, *Synalpheus*, 503
Control region 1, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Cospeciation, host switching, Markov chain Monte Carlo, molecular biology, molecular evolution, phylogeny, 352
Geographic variation, intergenic spacer, mitochondrial DNA, mole salamander, molecular phylogenetics, phylogeography, 1449

Physiology
Adaptive plasticity, cost of homeostasis, cost of plasticity, phytochrome, R:FR, 1982
Cost of reproduction, endurance, locomotor performance, natural selection, ovarian manipulation, reproductive burden, *Uta stansburiana*, yolkectomy, 1386

Plant-Insect Interaction
Alkaloids, *Datura stramonium*, evolutionary arms race, hyoscyamine, insect herbivory, natural selection, scopolamine, 778
Coevolution, convergent evolution, evolutionary trends, extended phenotypes, gall morphology, gradualism, insect-plant relationships, Nematinae, phylogeny, 526
Costs, *Datura stramonium*, genotype × environment interactions, herbivory, phenotypic plasticity, tolerance, 789

Plants
Adaptation, C-S-R model, environmental stress, flowering time, life-history evolution, phenotypic selection, selection experiment, *Sinapis arvensis*, stress avoidance, stress tolerance, 93
Adaptive radiation, angiosperms, character state change, diversity, flexibility hypothesis, Hawaiian flora, key innovation, phylogenetic effects, species richness, 1061
Agrostis capillaris, hemiparasitic plants, host-parasite interactions, local adaptation, *Rhinanthus serotinus*, virulence, 433
Alkaloids, *Datura stramonium*, evolutionary arms race, hyoscyamine, insect herbivory, natural selection, scopolamine, 778
Allozymes, Diptera, fitness, *Scathophaga*, sexual selection, sperm competition, 1680
Angiosperms, Bayes Theorem, comparative methods, diversity, flexibility hypothesis, phylogeny, 1066
Annual and perennial plants, evolution, evolutionarily stable strategy, iteroparity, semelparity, 145
Antagonism, grazing optimization, group selection, indirect effect, maximum power principle, mutualism, patchy environment, plant defense, plant palatability, primary production, spatial heterogeneity, 81
Arenaria uniflora, autogamy, male fitness, pollen discounting, self-fertilization, 1558
Artificial damage, herbivory, measurement error, natural damage, tolerance, 1024
Artificial selection, Brassicaceae, *Brassica rapa*, floral evolution, genetic constraints, genetic variation, *Raphanus raphanistrum*, 1433
Balancing selection, frequency-dependent selection, *Ipomoea*, morning glory, polymorphism, 691
Chloroplast, coalescence, haplotype, hybridization, *Pinus*, 1218
Chorthippus parallelus, colonization, grasshopper, likelihood, mating, Orthoptera, premating isolation, refugia, reproductive isolation, speciation, 1687
Colonization, gene flow, Hawaii, microevolution, *Odontosoria*, 828
Community genetics, *Eucalyptus*, generalists, herbivores, hybrid, specialists, species richness, terpenoids, 1938
Compensatory regrowth, *Ipomopsis aggregata*, plant-herbivore interaction, quantitative genetics, scarlet gilia, tolerance, ungulate grazing, 764
Conifers, fitness, genetic mapping, growth, inbreeding depression, loblolly pine, *Pinus taeda*, plants, stage specificity, survival, 1580
Costs, *Datura stramonium*, genotype × environment interactions, herbivory, phenotypic plasticity, tolerance, 789
Crossing relationships, *Helianthus*, hybrid speciation, hybridization, pollen viability, seed set, sunflower, 859
Cupressaceae, cuticular waxes, genetic adaptation, heritabilities, hydrocarbons, water stress, 1438
Disease, frequency-dependent disease attack, frequency-dependent selection, genetic polymorphisms, plant-pathogen interactions, 406
Distyly, floral development, herkogamy, heterostyly, ontogeny, *Psychotria*, Rubiaceae, 847
Fertility selection, genetic assimilation, *Helianthus annuus*, *Helianthus bolanderi*, hybrid index, hybrid zone, morphological evolution, sunflower, 462
Fitness, flowering phenology, germination, life-history evolution, maternal effects, parental effects, *Plantago lanceolata*, temperature, 1207
Genetic association, *Gilia*, herkogamy, inbreeding depression, mating-system evolution, 840
Genetic drift, mountain islands, *Pinus balfouriana*, population structure, serpentine soil, 1813
Genomic imprinting, greenhouse experiment, hybrid inviability, Onagraceae, reciprocal crosses, triploid block, 1182
Gynodioecy, heterostyly, male sterility, maternal effects, pollen performance, resource allocation, 866
Gynodioecy, inbreeding depression, Lamiaceae, outcrossing rate, seed production, sex ratio, 1510

Pleiotropy
Adaptation, complexity, Fisher's geometric model, fundamental theorem of natural selection, pleiotropy, 13
Antagonistic pleiotropy, cactus hosts, *Drosophila*, inversion polymorphism, life-history traits, 1295
Antagonistic pleiotropy, molecular chaperone, reproduction, senescence, trade-off, transgene, 2038
Drosophila melanogaster, genetic load, pleiotropy, synergistic epistasis, 1654

Polymorphism
Alcohol dehydrogenase, α glycerophosphate dehydrogenase, *Drosophila melanogaster*, gametic disequilibrium, inversions, latitudinal clines, polymorphism, 201
Allochronic speciation, assortative mating, color polymorphism, hybridization, *Magicicada*, risk spreading, secondary contact, 1326
Antagonistic pleiotropy, cactus hosts, *Drosophila*, inversion polymorphism, life-history traits, 1295
Asexual reproduction, clonal, fragmentation, genetic diversity, larval dispersal, scleractinian coral, 1590
Balancing selection, fitness, larval stage, LDH-B polymorphism, metamorphosis, nonneutral evolution, *Rana lessonae*, 1750
Balancing selection, frequency-dependent selection, *Ipomoea*, morning glory, polymorphism, 691
Coalescence theory, gene flow, likelihood ratio tests, maximum likelihood, population subdivision, single nucleotide polymorphisms, 44
Colonization, *Drosophila subobscura*, founder effect, microsatellites, nonequilibrium populations, RFLP, 696
D', disequilibrium coefficient, gametic disequilibrium, measures of the extent of disequilibrium, multiallelic loci, 1809
Damselflies, density-dependent selection, female color polymorphism, fertility, frequency-dependent selection, population structure, 2156
Disease, frequency-dependent disease attack, frequency-dependent selection, genetic polymorphisms, plant-pathogen interactions, 406
Habitat choice, Hardy-Weinberg equilibrium, heterozygosity, linkage disequilibrium, mate choice, polymorphism, selection, 586
Morphological polymorphism, soldier class, sperm competition, sperm-male conflict, 72

Population
Colorado, demography, diallel, lifetime fitness, natural populations, reproductive isolation, 485

Evolution, population genetics, selection, sex limitation, sexual dimorphism, 37

Population Biology

Pesticide resistance, shifting balance theory, stepping stone model, stochastic migration, varying deme size, 324

Population Structure

Adaptation, genetic drift, natural selection, peak shift, population structure, shifting balance, 306

Altruism, fecundity, overlapping generations, population structure, prisoner's dilemma, survival, 1135

Amazon Basin, life history, mitochondrial DNA, population genetic structure, *Proechimys*, 1423

Autodiploid parthenogenesis, *Campeloma limum*, dispersal, juvenile survivorship, mtDNA sequence variation, parasitism, sexual reproduction, 167

Bicyclus anynana, butterfly, genetic load, inbreeding depression, lethal equivalents, metapopulation, 218

Biogeography, *Girella*, mitochondrial DNA, population structure, 652

Brachyramphus marmoratus, coalescent theory, intron, marbled murrelet, population differentiation, 974

Canalization, changing environments, epistasis, evolvability, genetic architecture, genetic variance, modifier selection, 1

Characteristic value, *Drosophila melanogaster*, genetic architecture, genetic correlation, phenotypic plasticity, reaction norm, sexual dimorphism, 1035

Chloroplast DNA, gene flow, glacial refugia, hybridization/introgression, phylogeography, population structure, 1566

Cichlid, divergence with gene flow, habitat fragmentation, Lake Malawi, mbuna, *Metriaclima*, population structure, 1725

Clonal competition, deleterious mutations, fixation, metapopulation, Muller's ratchet, 1116

Coadaptation, drift, epistasis, Fisher-Wright controversy, heterosis, inbreeding depression, outbreeding depression, selection, shifting balance, 1157

Coalescence theory, gene flow, likelihood ratio tests, maximum likelihood, population subdivision, single nucleotide polymorphisms, 44

Coalescent, divergence, genealogy, migration, species, 1092

Colonization, *Drosophila subobscura*, founder effect, microsatellites, nonequilibrium populations, RFLP, 696

Common shrew, *F*-statistics, mitochondrial DNA, *R*-statistics, *Sorex araneus*, Y chromosome, 1414

Damselflies, density-dependent selection, female color polymorphism, fertility, frequency-dependent selection, population structure, 2156

Differential migration, interdemic selection, *Phalacrus substriatus*, 297

Distorter, meiotic drive, metapopulation model, responder, segregation distortion, Tcd, Tcr, 1795

Diversification, mathematical modeling, metapopulation, speciation, 1493

Drosophila melanogaster, fat content, latitudinal cline, starvation resistance, 1819

Effective population size, *Fritillaria camtschatcensis*, stage-structured population, 2007

Epistasis, evolutionary genetics, Fisher's large population size theory, metapopulation quantitative genetics, multilevel selection, Wright's shifting balance theory, 317

Fecundity, house finch, overwinter survival, pairing success, phenotypic selection, population divergence, sexual size dimorphism, 2134

Fire ants, gene flow, isozymes, migration-selection balance, population structure, selection, *Solenopsis invicta*, 606

Gene flow, genetic distance, *Orchestia*, *Platorchestia*, population genetic structure, *Talitrus*, 1606

Gene flow, grouse, *Lagopus*, mitochondrial DNA, philopatry, population structure, 279

Genetic drift, mountain islands, *Pinus balfouriana*, population structure, serpentine soil, 1813

Habitat choice, Hardy-Weinberg equilibrium, heterozygosity, linkage disequilibrium, mate choice, polymorphism, selection, 586

Local adaptation, population differentiation, spatial variation, temporal variation, 1173

Pesticide resistance, shifting balance theory, stepping stone model, stochastic migration, varying deme size, 324

Predation

Ambient temperature, body mass, cost of incubation, food, incubation behavior, incubation rhythm, life-history evolution, life-history strategy, mate feeding, nest attentiveness, nest predation, reproductive effort, Skutch's hypothesis, 670

Carcinus maenas, cogradient variation, countergradient variation, crab predation, growth, latitude, *Littorina obtusata*, natural selection, phenotypic plasticity, water temperature, 151

Quantitative Genetics

Acoustic communication, cross-environment genetic correlation, environmental heterogeneity, phenotypic plasticity, reaction norm, sexual selection, ultrasonic signaling, 953

Adaptation, common-garden experiment, garter snake, genotype × environment interaction, growth rate, temperature variation, *Thamnophis elegans*, 1760

Artificial selection, *Eichhornia paniculata*, nectar, ovules, pollen, quantitative genetics, trade-offs, 1533

C effects, carry-over effects, clonal propagation, *Eriophorum*, intergenerational environmental effects, maternal effects, quantitative genetics, 452

Caenorhabditis elegans, deleterious mutation, dominance, fitness, life-history characters, mutation load, mutation rate, quantitative traits, 1234

Chlamydomonas, conditional neutrality, environmental heterogeneity, fitness, genotype-environment interaction, mutation rate, mutational heritability, selection, 416

Chlamydomonas, diversity, genetic correlation, genetic distance, genotype-by-environment interaction, 425

Compensatory regrowth, *Ipomopsis aggregata*, plant-herbivore interaction, quantitative genetics, scarlet gilia, tolerance, ungulate grazing, 764

Costs, *Datura stramonium*, genotype × environment interactions, herbivory, phenotypic plasticity, tolerance, 789

Daphnia, genetic slippage, life-history evolution, linkage disequilibrium, parthenogenetic, quantitative traits, 1502

Development, epistasis, indirect genetic effects, maternal effects, quantitative trait loci, 1882

Epistasis, evolutionary genetics, Fisher's large population size theory, metapopulation quantitative genetics, multilevel selection, Wright's shifting balance theory, 317

Reproduction—Animal

Antagonistic pleiotropy, molecular chaperone, reproduction, senescence, trade-off, transgene, 2038

Anuran amphibians, external fertilizers, genetic benefits, polyandry, 968

Breeding time, divergence, migration time, rapid evolution, reproductive isolation, 1372

Copulation duration, *Drosophila melanogaster*, receptivity, sperm displacement, sperm number, 534

Cost of reproduction, endurance, locomotor performance, natural selection, ovarian manipulation, reproductive burden, *Uta stansburiana*, yolkectomy, 1386

Courtship song, *Drosophila*, female choice, sexual isolation, speciation, 1286

Cryptic female choice, sexual selection, sperm choice, sperm competition, 1052

Cryptic female choice, sexual selection, sperm choice, sperm competition, 1057

Cryptic female choice, sexual selection, sperm selection, 1047

D', disequilibrium coefficient, gametic disequilibrium, measures of the extent of disequilibrium, multiallelic loci, 1809

Effective population size, *Fritillaria camtschatcensis*, stage-structured population, 2007

Genetic compatibility, mate choice, sexual selection, sperm competition, 1050

Reproduction—Asexual
Asexual reproduction, clonal, fragmentation, genetic diversity, larval dispersal, scleractinian coral, 1590
Autodiploid parthenogenesis, *Campeloma limum*, dispersal, juvenile survivorship, mtDNA sequence variation, parasitism, sexual reproduction, 167
Breeding systems, evolution, freshwater crustaceans, outcrossing, selfing, 878
C effects, carry-over effects, clonal propagation, *Eriophorum*, intergenerational environmental effects, maternal effects, quantitative genetics, 452
Clonal growth, costs of plasticity, developmental stability, foraging, genetic variation, *Ranunculus reptans*, spurious correlations, 1947
Clonal reproduction, clonal structure, genotypic diversity, hybrid speciation, Louisiana irises, natural hybridization, 137
Daphnia, genetic slippage, life-history evolution, linkage disequilibrium, parthenogenetic, quantitative traits, 1502
Melanoides tuberculata, parthenogenesis, punctuated equilibrium, Raup's model, shell morphometry, 492

Reproduction—Plant
Acoustic communication, crickets, interspecific hybridization, mate recognition, phonotaxis, preference functions, speciation, 1303
Amazonian savannas, continental drift, Guayana Shield, hummingbird pollination, *ndh* F, Rapateaceae, seed dispersal, tepuis, vicariance biogeography, 1915
Andrena nigroaenea, chemical communication, learning behavior, *Ophrys sphegodes*, pollination by sexual deception, reproductive success, scent variation, 1995
Annual and perennial plants, evolution, evolutionarily stable strategy, iteroparity, semelparity, 145
Arenaria uniflora, autogamy, male fitness, pollen discounting, self-fertilization, 1558
Artificial selection, *Eichhornia paniculata*, nectar, ovules, pollen, quantitative genetics, trade-offs, 1533
Competition, *Ipomopsis aggregata*, natural selection, pollination, 1546
Correlational selection, curvature selection, female fitness, hawkmoths, male fitness, orchids, phenotypic selection, plant reproduction, pollination, projection, selection surfaces, 112
D', disequilibrium coefficient, gametic disequilibrium, measures of the extent of disequilibrium, multiallelic loci, 1809
Fitness, flowering phenology, germination, life-history evolution, maternal effects, parental effects, *Plantago lanceolata*, temperature, 1207
Genetic association, *Gilia*, herkogamy, inbreeding depression, mating-system evolution, 840
Gynodioecy, heterostyly, male sterility, maternal effects, pollen performance, resource allocation, 866
Gynodioecy, inbreeding depression, Lamiaceae, outcrossing rate, seed production, sex ratio, 1510

Reptiles
Adaptation, common-garden experiment, garter snake, genotype × environment interaction, growth rate, temperature variation, *Thamnophis elegans*, 1760
Allometry, *Anolis* lizards, ANOVA, body size, comparative methods, phylogenetic effect, sexual selection, 259
Anniella, cytochrome *b*, parallel evolution, thermal melanism, 1041
Anolis oculatus, cytochrome *b*, Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Control region 1, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Endothermy, homeothermy, reptile, thermoregulation, *Varanus*, 1768

Resistance
Cost of resistance, disease, herbivory, mutualism, parasitism, rust fungi, tolerance, 51
Disease, frequency-dependent disease attack, frequency-dependent selection, genetic polymorphisms, plant-pathogen interactions, 406

Selection—Artificial
Artificial selection, Brassicaceae, *Brassica rapa*, floral evolution, genetic constraints, genetic variation, *Raphanus raphanistrum*, 1433
Artificial selection, *Eichhornia paniculata*, nectar, ovules, pollen, quantitative genetics, trade-offs, 1533
Correlated evolution, evolutionary constraint, *Heterandria formosa*, selection experiment, 238

Selection—Experimental
Aging, *Drosophila*, mating frequency, 2152
Artificial damage, herbivory, measurement error, natural damage, tolerance, 1024
Bacteriophage evolution, deleterious mutations, experimental evolution, fitness, RNA viruses, 686

Selection—Group/Kin
Altruism, fecundity, overlapping generations, population structure, prisoner's dilemma, survival, 1135
Antagonism, grazing optimization, group selection, indirect effect, maximum power principle, mutualism, patchy environment, plant defense, plant palatability, primary production, spatial heterogeneity, 81
Cost of reproduction, dispersal, kin selection, life history, relatedness, 293
Family selection, inbreeding, kin selection, maternal effects, maternal-fetal interaction, neutrality, 290

Selection—Natural
Adaptation, C-S-R model, environmental stress, flowering time, life-history evolution, phenotypic selection, selection experiment, *Sinapis arvensis*, stress avoidance, stress tolerance, 93
Adaptation, complexity, Fisher's geometric model, fundamental theorem of natural selection, pleiotropy, 13
Adaptation, damselflies, *Enallagma*, enzyme kinetics, Odonata, predator avoidance, swimming, 2072
Adaptive plasticity, density-dependent selection, environmental heterogeneity, local adaptation, natural selection, phenotypic plasticity, 1956
Alkaloids, *Datura stramonium*, evolutionary arms race, hyoscyamine, insect herbivory, natural selection, scopolamine, 778
Allozymes, gene flow, microsatellites, mitochondrial DNA, natural selection, 640
Anuran amphibians, external fertilizers, genetic benefits, polyandry, 968
Balancing selection, episodes of selection, lifetime fitness, longevity, natural selection, sexual selection, 558
Balancing selection, frequency-dependent selection, *Ipomoea*, morning glory, polymorphism, 691
Breeding time, egg size, growth, maternal effects, mortality, *Salmo salar*, selection, 628
Carcinus maenas, cogradient variation, countergradient variation, crab predation, growth, latitude, *Littorina obtusata*, natural selection, phenotypic plasticity, water temperature, 151
Cliff swallows, mortality, natural selection, selection index, selection intensity, 1824
Competition, *Ipomopsis aggregata*, natural selection, pollination, 1546
Correlational selection, environmental heterogeneity, phenotypic selection, plasticity, shade-avoidance responses, 124
Cost of reproduction, endurance, locomotor performance, natural selection, ovarian manipulation, reproductive burden, *Uta stansburiana*, yolkectomy, 1386
Damselflies, density-dependent selection, female color polymorphism, fertility, frequency-dependent selection, population structure, 2156
Disease, frequency-dependent disease attack, frequency-dependent selection, genetic polymorphisms, plant-pathogen interactions, 406
Drosophila melanogaster, fluctuating asymmetry, heritability, selection, sternopleural bristle number, temperature stress, variation, 1444

Evolution, fitness variation, genetic systems, natural selection, 337
Family selection, inbreeding, kin selection, maternal effects, maternal-fetal interaction, neutrality, 290
Fecundity, house finch, overwinter survival, pairing success, phenotypic selection, population divergence, sexual size dimorphism, 2134
Fire ants, gene flow, isozymes, migration-selection balance, population structure, selection, *Solenopsis invicta*, 606

SELECTION—SEXUAL
Acoustic communication, cross-environment genetic correlation, environmental heterogeneity, phenotypic plasticity, reaction norm, sexual selection, ultrasonic signaling, 953
Acrididae, divergence times, insects, Melanoplinae, *Melanoplus*, Orthoptera, phylogeny, Pleistocene, sexual selection, speciation, 1337
Allometry, *Anolis* lizards, ANOVA, body size, comparative methods, phylogenetic effect, sexual selection, 259
Allozymes, Diptera, fitness, *Scathophaga*, sexual selection, sperm competition, 1680
Amblyornis inornatus, bowerbirds, premating isolation, sexual selection, speciation, 273
Assortative mating, isolating mechanisms, models, preferences, reinforcement, speciation, 21
Assortative mating, mate choice, mate propensity, mate selection, mating pattern, mating success, 30
Avian plumage coloration, character evolution, convergent evolution, evolutionary constraints, homoplasy, Icteridae, phylogeny, sexual selection, 2119
Balancing selection, episodes of selection, lifetime fitness, longevity, natural selection, sexual selection, 558
Behavior, premating isolation, reinforcement, sexual selection, speciation, 567
Beneficial mutations, compensatory mutations, conservation genetics, drift load, genetic drift, mutation meltdown, sexual selection, 1855
Birds, gulls, hybrid superiority, hybrid zone, *Larus*, mate choice, 1774
Callosobruchus maculatus, fecundity, genetic compatibility, polyandry, 2161
Carotenoid coloration, condition-dependent indicators, geographic variation, mate choice, sexual selection, 1712
Carpodacus mexicanus, genetic correlation, phenotypic covariance, sexual size dimorphism, 1784
Charadrii, display behavior, niche division, sexual selection, size dimorphism, waders, 1404
Cichlids, disruptive selection, interbreeding, mate recognition system, separatrix, sexual selection, speciation, 1870
Cline, costly female preference, Fisher's runaway process, reinforcement, reproductive character displacement, sexual selection, spatial variation, 715
Complexity, greenish warbler, *Phylloscopus trochiloides, plumbeitarsus*, ring species, sexual selection, song, speciation, 998
Conspecific sperm precedence, *Drosophila*, homogamy, multiple mating, reproductive isolation, seminal fluid, sperm competition, *Wolbachia*, 2028
Copula duration, optimality theory, P_2, *Scatophaga*, sperm competition, 924
Correlational selection, curvature selection, female fitness, hawkmoths, male fitness, orchids, phenotypic selection, plant reproduction, pollination, projection, selection surfaces, 112
Courtship song, *Drosophila*, female choice, sexual isolation, speciation, 1286
Cryptic female choice, sexual selection, sperm choice, sperm competition, 1052
Cryptic female choice, sexual selection, sperm choice, sperm competition, 1057
Cryptic female choice, sexual selection, sperm selection, 1047
DNA microsatellites, nuptial feeding, sperm competition, sperm storage, tettigoniids, 942
Drosophila, sperm competition, sperm precedence, 1030
Egg preference, energy reserves, mate sampling, residual reproductive value, sexual selection, 617
Evolution, population genetics, selection, sex limitation, sexual dimorphism, 37
Genetic compatibility, mate choice, sexual selection, sperm competition, 1050
Handicap principle, Hirundinidae, initial evolution, *Riparia riparia*, sexual selection, tail ornaments, 704
Mate choice, mating preferences, playback experiments, preference functions, repeatability, sexual selection, treefrogs, 660
Mating preferences, runaway, sexual selection, 1862
Morphological polymorphism, soldier class, sperm competition, sperm-male conflict, 72

SENESCENCE
Aging, *Drosophila*, mating frequency, 2152
Antagonistic pleiotropy, molecular chaperone, reproduction, senescence, trade-off, transgene, 2038

SEX
Acquired immunity, coevolution, epistasis, evolution of sex, fluctuating epistasis, Red Queen, 1142
Copula duration, optimality theory, P_2, *Scatophaga*, sperm competition, 924
Evolution, population genetics, selection, sex limitation, sexual dimorphism, 37

SEX RATIO
Gynodioecy, inbreeding depression, Lamiaceae, outcrossing rate, seed production, sex ratio, 1510

SPECIATION
Acoustic, cuticular hydrocarbons, founder effect, mating signal, morphology, Orthoptera, refugia, reproductive isolation, speciation, 574
Acoustic communication, crickets, interspecific hybridization, mate recognition, phonotaxis, preference functions, speciation, 1303
Acrididae, divergence times, insects, Melanoplinae, *Melanoplus*, Orthoptera, phylogeny, Pleistocene, sexual selection, speciation, 1337
Allochronic isolation, life-cycle evolution, *Magicicada*, reinforcement, reproductive character displacement, reproductive isolation, speciation, 1313
Allochronic speciation, assortative mating, color polymorphism, hybridization, *Magicicada*, risk spreading, secondary contact, 1326
Allopatric, *Drosophila*, postzygotic, prezygotic, reinforcement, reproductive isolation, speciation, sympatric, 210
Allozymes, phylogeny, *Rhagoletis*, speciation, sympatric, 543
Amblyornis inornatus, bowerbirds, premating isolation, sexual selection, speciation, 273
Anolis oculatus, cytochrome *b*, Dominica, gene flow, Lesser Antilles, mitochondrial DNA, phylogenetic analysis, phylogeography, selection, speciation, vicariance, volcanism, 245
Aphid, *Buchnera*, coevolution, cospeciation, phylogenetic congruence, symbiont, *Uroleucon*, 517
Assortative mating, isolating mechanisms, models, preferences, reinforcement, speciation, 21
Assortative mating, mate choice, mate propensity, mate selection, mating pattern, mating success, 30
Basidiomycetes, ectomycorrhiza, *Hebeloma crustuliniforme*, reproductive isolation, sexual intercompatibility, speciation, 1192
Beaked whales, dentition, *Mesoplodon*, species isolating mechanism, species recognition, 2171
Behavior, premating isolation, reinforcement, sexual selection, speciation, 567
Biogeography, birds, oceanic islands, sympatric speciation, 2166
Biogeography, cryptic speciation, dispersal, *Eurytemora affinis*, hybrid breakdown, phylogeography, 2014
Breeding time, divergence, migration time, rapid evolution, reproductive isolation, 1372
Caribbean, cline, *Drosophila*, pigmentation, selection, speciation, 2046
Caribbean, development, *Drosophila*, genetics, pigmentation, speciation, 2057

Centrifugal speciation, holey adaptive landscapes, mathematical modeling, parapatric, peripatric, 1126
Chorthippus parallelus, colonization, grasshopper, likelihood, mating, Orthoptera, premating isolation, refugia, reproductive isolation, speciation, 1687
Cichlids, disruptive selection, interbreeding, mate recognition system, separatrix, sexual selection, speciation, 1870
Cline, costly female preference, Fisher's runaway process, reinforcement, reproductive character displacement, sexual selection, spatial variation, 715
Clonal reproduction, clonal structure, genotypic diversity, hybrid speciation, Louisiana irises, natural hybridization, 137
Colorado, demography, diallel, lifetime fitness, natural populations, reproductive isolation, 485
Complexity, greenish warbler, *Phylloscopus trochiloides, plumbeitarsus*, ring species, sexual selection, song, speciation, 998
Conspecific sperm precedence, *Drosophila*, homogamy, multiple mating, reproductive isolation, seminal fluid, sperm competition, *Wolbachia*, 2028
Cospeciation, host switching, Markov chain Monte Carlo, molecular biology, molecular evolution, phylogeny, 352
Courtship song, *Drosophila*, female choice, sexual isolation, speciation, 1286
Crossing relationships, *Helianthus*, hybrid speciation, hybridization, pollen viability, seed set, sunflower, 859
Cytoplasmic incompatibility, *Drosophila* parasitoid, haplodiploid species, invasion strategy, *Wolbachia*, 191
Diversification, mathematical modeling, metapopulation, speciation, 1493
DNA, fruit fly, mating isolation, speciation, sympatry, tephritid, 899
Drosophila persimilis, Drosophila pseudoobscura, gene flow, genic introgression, reinforcement, speciation, 2176
Drosophila persimilis, Drosophila pseudoobscura, gene flow, introgression, reinforcement, speciation, 2174
Ecological genetics, ecological speciation, herbivory, host races, hybrid unfitness, speciation, 1626
Extinction, genetic divergence, island isolation, migration, speciation, 387
Habitat choice, Hardy-Weinberg equilibrium, heterozygosity, linkage disequilibrium, mate choice, polymorphism, selection, 586

SYMBIOSIS

Cytoplasmic incompatibility, *Drosophila simulans*, geographic variation, symbiont, *Wolbachia pipientis*, 1661

SYSTEMATICS

Ancestor-state reconstruction, autoregression model, comparative method, phylogenetic inertia, *Tithonia*, 475
Control region 1, cytochrome *b*, *Elaphe obsoleta*, evolutionary biology, maximum likelihood, maximum parsimony, mitochondrial DNA, species, subspecies, 2107
Haeckel, heterochrony, molecular systematics, ontogeny, paedomorphosis, recapitulation, von Baer, 1349

VARIATION

Adaptive variation, heterozygosity, inbreeding coefficient, phylogenetic tree, substitution rate, 2145
Allometric engineering, fitness surfaces, follicle ablations, maternal effects, neighborhoods, selection gradients, spatial variation, 1396
Andrena nigroaenea, chemical communication, learning behavior, *Ophrys sphegodes*, pollination by sexual deception, reproductive success, scent variation, 1995
Artificial selection, Brassicaceae, *Brassica rapa*, floral evolution, genetic constraints, genetic variation, *Raphanus raphanistrum*, 1433
Betta, Danio, heterochrony, intraspecific variation, ossification sequence, zebrafish, 2091
Carcinus maenas, cogradient variation, countergradient variation, crab predation, growth, latitude, *Littorina obtusata*, natural selection, phenotypic plasticity, water temperature, 151
Cis-regulation, development, evolution, evolutionarily relevant mutations, mutation, transcription, variation, 1079
Cline, costly female preference, Fisher's runaway process, reinforcement, reproductive character displacement, sexual selection, spatial variation, 715
Clonal growth, costs of plasticity, developmental stability, foraging, genetic variation, *Ranunculus reptans*, spurious correlations, 1947
Cytoplasmic incompatibility, *Drosophila simulans*, geographic variation, symbiont, *Wolbachia pipientis*, 1661
Drosophila melanogaster, fluctuating asymmetry, heritability, selection, sternopleural bristle number, temperature stress, variation, 1444
Geographic variation, intergenic spacer, mitochondrial DNA, mole salamander, molecular phylogenetics, phylogeography, 1449
Local adaptation, population differentiation, spatial variation, temporal variation, 1173

VIRUSES

Bacteriophage evolution, deleterious mutations, experimental evolution, fitness, RNA viruses, 686
